

# BP Settling Tube

**Brand:** OFI Testing Equipment, Inc.  
**Product Code:** 122-086  
**Availability:** Out Of Stock  
**Lead Time:** 45

## Description

The BP Settling Tube is used to test the settling characteristics of a well cement. The cement slurry is poured into the tube and then cured in a Consistometer or water bath. After the cement has cured, the column is then cut into pieces and the density of each piece is measured using Archimedes Principle.

## Features

- Tests the settling characteristics of a well cement
- Includes brass tube, top and bottom cap, and two hose clamps
- Size: 8.5" Tall × 2" Diameter (23 × 5 cm)
- Weight: 1.5 lb (.68 kg)

## Part Number

- #122-086
